

The 3 suggested alternating times are the following:

- **12:00 UTC** (“green” or within business hours for Europe/Africa, late for AP, and very early for Americas)
- **19:00 UTC** (“green” or within business hours for the Americas, late for EMEA, and very early for AP)
- **06:00 UTC** (mostly “green” or within extended business hours for Asia/Asia Pacific, early for EMEA, and late but still possible for the Americas)

How this analysis was conducted:

- 2 time zones for each region (note: these are representative examples for analysis only)
- All times that indicated “red” areas for 3 time zones or more were blacked out and not considered
- Preference for time zones with only 1 “red” area (ex: 19:00 UTC)
