I am a senior executive of Neustar, the usTLD Administrator for the .us country-code top-level domain under contract with the United States Department of Commerce. In addition, Neustar is the ICANN-accredited Registry Operator for the .BIZ top-level domain and the registry service provider for the .travel and .tel gTLDs. I am aware of the ccNSO's structure and operations based on my direct involvement in the ICANN process, as a member of the Nominating Committee three times, my analysis and input to various members of the ccNSO committees over the years, most specifically Jeff Neuman, former Neustar employee Keith Drazek and Fernando Espana, my attendance at ccNSO meetings, and my reading of the various ccNSO minutes and reports.

- A one to two paragraph statement about the applicant's specialized technical or other expertise of direct relevance to the responsibilities of the review team in question.

I have been involved in the IT world since 1973. More specifically I have been intimately involved with the commercial development of the Internet for over 20 years. This has included more than 13 years of work on the DNS, and a particular focus on security, stability, and resilience of the DNS as the creator, inventor, designer, and operator of the largest commercial provider of DNS services. Please see my CV for specific details.
