

## JAS WG

The ALAC is pleased to note interest from the Board and other stakeholders towards the second Milestone Report of the Cross-community Joint Applicant Support Working Group (JAS WG). To this extent, it therefore welcomes the organisation of a conference call -- for interested members of the JAS WG, ICANN Board, GNSO, GAC, At-Large and other interested community members -- to discuss the status and way forward for the JAS WG. We also request the creation of a multi-stakeholder meeting on this issue to be held at the ICANN meeting in Singapore..
