

**Dear**

I am excited to apply for ccNSO Appointed Delegate position at 2022 ICANN NomCom. I am an active member of ccNSO community for a long time and willing to take more responsibility as an appointed member at NomCom.

Following a contentious discussion period, redelegation process for “.tr” registry has been finally completed in 2018. I have been a part of the whole process which made me gain extensive knowledge and experience in ICANN governance structure and decision-making process. In addition to that, I am volunteering at IGLC and MPC of ccNSO by sparing time and doing my best to contribute for more than 2 years.

I think I can make good delegate at NomCom because I have experience in both ICANN ecosystem and hiring process. My experience stems from my work at ccNSO working groups mentioned above and our work at local level as the “.tr” registry and prior experience in Turkish DNS system. I also take part in recruitment process of my employer by attending job interviews, sorting resumes, and shortlisting best candidates. I know what it means to hire the most suitable applicant by considering various performance indicators while keeping diversity in terms of gender, educational background, and work experience.

Furthermore, I am an active investor in tech start-ups which requires attending pitching events where founders try to attract funds from investors, evaluating start-up ideas and determining an appropriate valuation. Stakes are high when there is the investment opportunity with real money. This makes me an efficient and fast information consumer to reach the optimal investment decision in limited time while competing with other investors.

Finally, my educational background and work experience combines technical skills with managerial responsibility. I am a young professional with full enthusiasm, energy, and time to contribute to all stages of nominee selection process. I want to be the *young member* of this committee. Moreover, my ongoing PhD study in decision making field trained me for making sound judgments and decisions by employing scientific approaches and avoiding common psychological traps.

In short, I believe that I can make a good delegate and if I am selected for this position, I am going to put all my experience and devotion to NomCom’s work.

**Regards,**

Abdullah Cemil AKÇAM
