Instructions

Theme - Local Presence

RFC 1591 stipulates that “... *at least the administrative contact must reside in the country involved.*”

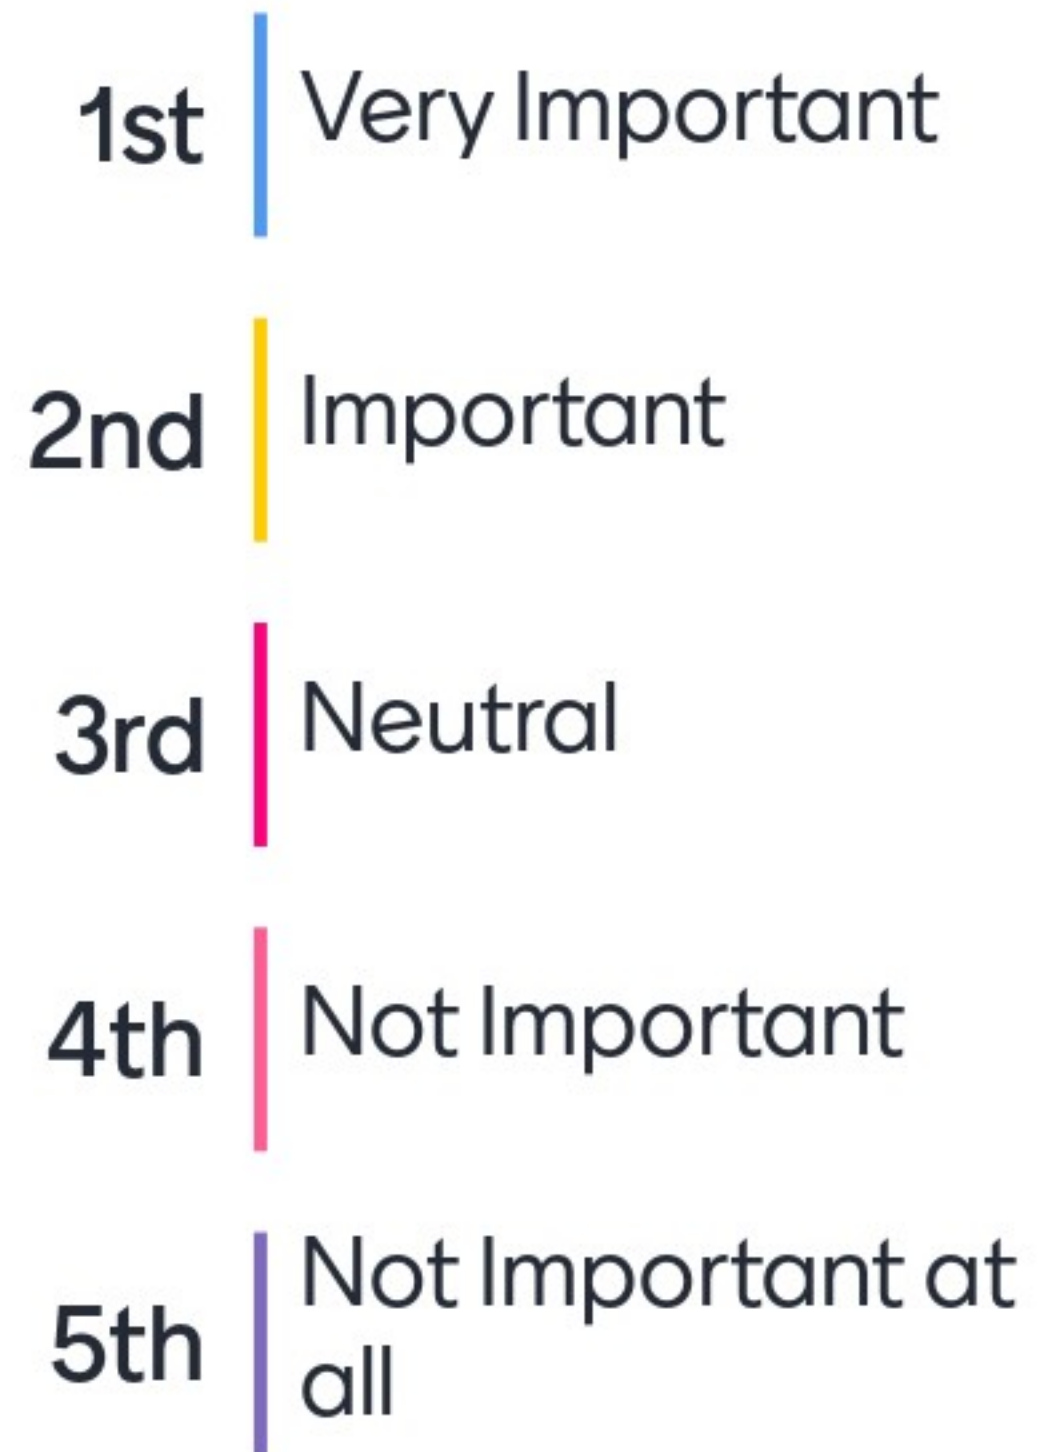

IANA interpretation: where is the ccTLD manager (as a legal entity) is domiciled, and where is primary operations are conducted

Do you have any questions or comments?

Do you believe the local presence requirement is important from a ccTLD perspective?

Why did you rate the importance the way you did?

Does lack of explicit local presence requirement illustrate a GAP that needs to be filled?

- 2nd | Agree
- 3rd | Neutral
- 4th | Disagree
- 5th | Strongly disagree

Minimum level of involvement

There is a wide variety of operational situations for ccTLD managers. Some ccTLD managers are responsible for every aspect of the ccTLD.

However, in many cases, there are a complex set of interrelated parties with different responsibilities.

IANA often has difficulties in reaching decision makers or identifying the true parties that are managing the domain
