

# What specific information does UAC want to gather, via the survey

What do ccTLDs need to start implementing the UA roadmap\_

Good reasons for ccTLDs to introduce IDNs or move forward with UA implementation

What is preventing ccTLDs to move forward with UA

How to activate registrars - what works, what doesn't

Whether ccTLD cares about UA adoption or not ! If not Why!

What are the challenges towards UA adoption !

To map practical challenges and wins of IDN introduction

Do the local communities need more awareness about UA !

# What specific information does UAC want to gather, via the survey

Are you ready for the UA adoption ! needs support !

Their local UA strategy to implement the UA broader. (governments, academia engagements, what actions they see more important for local adoption)

Gather members problems address their issues

What beneficial attempts have you made to promote the development of IDN

measure the current UA readiness levels of the ccTLDs

UA adoption landscape for ccTLD's in order to support to deploy or have a good testimonials for encouraging other ccTLD's

what are the difficulties currently encountered in the development of IDN

# Who is the target audience of the UAC survey

8 responses

cctlds  
mainly technical staff  
ua adoption or not  
idn cctlds  
weather cctld care about  
all cctlds no limit to cctld  
email service provider

# How will UAC use the survey results

Improve the uac charter and activities

Test

Present the results to raise awareness about the pluses and minuses of implementing IDNs with the motivation get more active support by ccTLDs to IDNs and UA

first, to understand the basic situation of IDN deployment in ccTLDs; second, to learn about the development experience of IDN in ccTLDs; and third, to call for more ccTLDs to join UAC.

Address their issues, and try to find solutions for them
