

**Motion - DNS Abuse Mitigation - PDP 1 and PDP 2**

**Submitted by: Jennifer Chung**

**Seconded by:**

WHEREAS,

1. The GNSO Council recognizes that DNS Abuse is a longstanding topic<sup>[1]</sup> that the GNSO has devoted two Small Teams to in 2022 and 2025;
2. In April 2025, the GNSO Council tasked a Small Team consisting of Council members to consider what policy efforts, if any, the GNSO Council should consider undertaking after considering new data that has been received, since the last DNS Abuse Small Team [Recommendations](#) in 2022;
3. The Small Team delivered its [Report](#), containing 4 recommendations, to the GNSO Council on 4 August;
4. The GNSO Council [requested](#) an Issue Report on DNS Abuse in August 2025 and in doing so, suggested three (3) priority topics that should be included in the Policy Development Process (PDP) on DNS Abuse that is expected to follow the completion of the Final Issue Report;
5. The Preliminary Issue Report was published for [Public Comment](#) on 8 September and received 27 submissions;
6. During [ICANN84](#), the GNSO organised a working session on DNS Abuse to further inform the Final Issue Report and Draft Charter;
7. On 13 November, the Council discussed the proposed updates to the Final Issue Report based on community input and provided further feedback on PDP structure, the WG Model, and Charter Questions/Scope;
8. On 1 December 2025, the [Final Issue Report on a PDP on DNS Abuse Mitigation](#) was delivered to the GNSO Council, which accounted for the Public Comment review process summarized through a [Public Comment Summary Report](#);
9. Informed by the DNS Abuse Small Team's recommendations, the Public Comment on the Preliminary Issue Report, the ICANN84 DNS Abuse working sessions, and the clear preference for narrowly scoped Policy Development Processes (PDP), the Final Issue Report recommends separate PDPs on:
  - a. **Associated Domain Checks:** A reactive approach requiring registrars to investigate domains linked to malicious actors, particularly in cases of high-volume domain registrations used for DNS Abuse campaigns; and,
  - b. **Safeguards for Application Programming Interface (API) access to new customers:** A proactive approach that seeks to introduce friction for new customer accounts, prior to gaining access to high volume registration tools until trust is established.
10. The Final Issue Report further recommends that the PDP on Associated Domain Check be started first, hereafter DNS Abuse Mitigation PDP 1 and the PDP on Safeguards for unrestricted Application Programming Interface (API) access, hereafter DNS Abuse Mitigation PDP 2, second, when the Council decide it is an appropriate time taking into consideration the progress and resources needed for DNS Abuse Mitigation PDP 1.

RESOLVED,

1. The GNSO Council adopts the recommendation for two (2) PDPs on DNS Abuse Mitigation and initiates DNS Abuse Mitigation PDP 1 and DNS Abuse Mitigation PDP 2.

2. The GNSO Council approves the PDP WG charter for DNS Abuse Mitigation PDP 1 (Associated Domain Checks).
3. The GNSO Council requests that DNS Abuse Mitigation PDP 1 Working Group be convened as soon as possible.
4. The GNSO Council requests that the GNSO Secretariat publish the Call for Volunteers for Members, Observers, and relevant liaisons per the membership structure within the DNS Abuse Mitigation PDP 1 Charter.
5. The GNSO Council will revisit the draft Charter on DNS Abuse Mitigation PDP 2 when deemed appropriate based upon the progress and resources needed for PDP 1.
6. The GNSO Council requests that DNS Abuse Mitigation PDP 2 be convened after the Charter is adopted.
7. The GNSO Council thanks the DNS Abuse Small Team, the ICANN Community and everybody who contributed to it for their efforts in moving this important topic forward, with the aim to improve the security and stability of the Internet.
