Re: Registration Data Request Service (RDRS) Follow Up

Sebastien Ducos
Chair, Generic Names Supporting Organization (GNSO) Council

Dear Sebastien,

Thank you for your 4 May 2023 [letter to the Board](#) following up on the Board's [resolution of 27 February 2023](#) directing ICANN org to develop and launch the Registration Data Request Service (RDRS).

Thank you for considering the Board's requests as laid out in the resolution. The Board has received and is currently reviewing the [1 June 2023 letter from the GNSO Council](#) with the proposed success criteria for the RDRS. The Board looks forward to hearing more about how to encourage system participation by both requestors and ICANN-accredited registrars.

The Board acknowledges the Council's decision not to consider policy development at this stage for a service that is of a temporary nature and expected to be operational by November 2023. The Board would like to suggest that we revisit the concept of policy development after the service is launched, should we find there is additional work needed to increase registrar participation.

The Board looks forward to further collaboration with the Council, as well as the Small Team, as the RDRS continues to be developed.

Regards,

Tripti Sinha
Chair, ICANN Board of Directors
