

In effect, we have proposed a blanket reservation of the words OLYMPIC and OLYMPIAD at the top-level. Thus, for the first round of applications, no one may register dot-Olympic or dot-Olympiad, foreign translations or any confusingly similar strings at the top-level. We have further proposed a blanket reservation of the literal words OLYMPIC and OLYMPIAD at the second-level, with the caveat that Registry Operators may opt reach an agreement with the IOC to register these strings in a manner consistent with any grandfathered rights or fair uses.
