

Privacy Proxy Service Accreditation Agreement Discussion Items

*Updated 15 August 2017

Status:

To be discussed at next IRT meeting
IRT has discussed; ICANN is analyzing IRT input.
Additional IRT feedback is requested.
Not yet discussed
Resolved.

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
1	1	Updates to Definitions From Final Report	Certain definitions have been adjusted slightly from definitions in final report: 1.22 Privacy Service; 1.24 Proxy Service; 1.25 Publication. These definitions were updated to reflect additional defined terms (for example, “beneficial user” changed to “Customer” etc; “Registration Directory Service” updated to “Registration Data Directory Service”)	On 15 August IRT call: Update to definition of “Proxy Service” could help in discussion of Customer Data Accuracy (there is a contractual relationship between a registrar and a proxy service for each individual name).	Discussed at 15 August IRT meeting. Any additional IRT input requested on-list by 21 August. If no additional input (or no contrary input) is received, these definitions will be kept (as updated) and this issue will be marked as “resolved.”
2	1.21	Provider Approval	The Draft contemplates needing the affirmative approval of 50% plus one of all Service Providers for global amendments. Please advise if this is appropriate or if some other metric should be used.		This issue has been collapsed into Issue 3. Resolved.
3	1.42; 6; 7.4	Working Group; Amendments	Like the RA and the RAA, the PPAA needs a method to implement global amendments. However, Service	Feedback at 18 July meeting: Amendment process may be too complicated	Updated language based on IRT discussion discussed at 15 August IRT meeting. Edits proposed in

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
			<p>Providers do not have a Stakeholder Group. The Draft contemplates a Working Group to fill this role until a Provider Stakeholder Group is formed (if ever).</p>	<p>Feedback at 25 July meeting: Maybe there could be a process for amendments to be considered by a re-convened IRT for a period of time (1-2 years) before reverting to this Section 7.4, as this is a completely new agreement and issues may arise as it goes into effect.</p> <p>Feedback at 15 August meeting: >This looks OK. It makes sense not to say re-convene the IRT explicitly. I feel reasonably confident that GNSO would look to the IRT list as the first stop. One proposed change—in the clause about a provider stakeholder group. If there is one, it shouldn't be appointing all the representatives to the WG, just the service provider representatives to the WG that is convened by the GNSO. >Support expressed for recommendation above.</p> <p>>Is the number of negotiations open here? Concern about gridlock. Should the number of negotiations allowed/year be limited?</p> <p>>2 year period for allowing multiple negotiations/year sounds ok</p>	<p>definition of “Working Group” and in Section 7.4.1.</p> <p>Any additional IRT feedback requested on this topic by 21 August.</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>> Not sure we need to micromanage this, presumably amendment topics would be consolidated...</p>	
4	3.2.2	Data Retention	<p>The RAA provides that this information is to be kept for two years, but ICANN proposes that Providers only keep it for one in order to limit the number of exemption requests</p>	<p>Feedback at 25 July meeting: Ensure that PSWG is on call where this is discussed.</p> <p>Feedback at 8 August IRT meeting: <u>Lindsay Hamilton-Reed:</u> Under European law, we can only retain data for as long as is necessary. We have difficulties with one year, never mind two.</p> <p><u>Roget Carney:</u> This section mentions registrar—ensure references are changed to provider.</p> <p><u>Theo Geurts:</u> I don't like this. The original data retention specification was already problematic in 2013, and other work is currently ongoing re: the GDPR. As a practical matter, if we are going to collect data, which we are all doing, and there needs to be some form of retention, it should be meeting applicable law. If we have language from 2 years from 1 year--- should just mention meeting applicable law. If data is collected and processed, it should be up to the provider to retain for the period</p>	<p>Discussed at 8 August IRT meeting.</p> <p>Additional IRT Feedback requested by 14 August.</p> <p>Section will be reviewed to ensure all references to registrars are changed to “provider.”</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>allowed under applicable law. I would highly suggest we revise this language to that effect. Please don't apply the waiver process—expensive and time-consuming.</p> <p><u>Lindsay Hamilton-Reed</u>: Agreed, Theo!</p> <p><u>Theo Geurts</u>: I don't think it's the data collection that is the problem—we are all collecting data. The biggest issue is ICANN (or another third party) obtaining that information—that is usually a no-go. That's one of the big issues here. There's a big difference between collecting data and making data available outside the provider/registrar and that's the key problem with the entire thing.</p> <p><u>Vicky Sheckler</u>: at the p/p level. ok if for affiliated pp to have data at registrar level in certain scenarios</p> <p><u>Lindsay Hamilton-Reed</u>: Well not really. We have to bear in mind the purpose of a privacy provider.</p> <p><u>Vicky Sheckler</u>: we have already gone through in the PDP process areas where data needs to be disclosed. in</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>order to disclose the data, it needs to be collected and retained for some period of time</p> <p><u>Susan Kawaguchi</u>: agree with Vicky</p> <p>Re: Specification 6</p> <p><u>Susan Kawaguchi</u>: OK with these data points</p> <p><u>Vicky Sheckler</u>: Ok w/data points</p> <p><u>Theo Geurts</u>: still processing</p> <p><u>Carlton Samuels</u>: I have always believed the waiver process was makework for lawyers. Why not align it to "applicable law" and stop making these folks scofflaws in their own country</p>	
5	3.5	Code of Conduct	How should a “consensus” be measured for purposes of establishing a Code of Conduct for Service Providers?	<p>On list 31 July:)This is a third order issue that I hope will not detain us now, since it deals with a hypothetical future Code of Conduct that would certainly have to go through some kind of extensive drafting and review process. If and when such an effort</p>	<p>Discussed during 1 August IRT meeting.</p> <p>Resolved. This section will be deleted in PPAA draft v2.</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>gets underway then I agree that the definition of consensus would need to be established. Let's not spend time on it now.</p> <p>1 August IRT call: Point 1: I don't think this should be in the PPAA—if it is not part of the recommendations—skip it.</p> <p>Chat—7 additional IRT members said this should be deleted from the PPAA draft.</p>	
6	3.5.4.1, 3.5.4.17	Cancellation (PP Service and Domain Name)	<ol style="list-style-type: none"> 1. Please advise on cancellation process. 2. How would a Service Provider prohibit cancellation of a domain name that is the subject of a UDRP dispute? 	<p>Part A: On list (31 July): I agree that the reference to cancellation of the registered name agreement should probably be dropped from 3.5.4.1, as that action has to be taken by the registrar. {Perhaps the provider should be required to notify the registrar immediately of the breach, simultaneously with supplying it with the “actual” contact information for the customer so that the latter can be published.}</p> <p>1 August IRT call: Point 1: This works pretty well for Rrs and affiliates, but not sure how a TPP would be able to do this.</p>	<p>Discussed at 1 August IRT meeting and on-list. ICANN is currently evaluating IRT input and will propose next steps based on this feedback.</p> <p>Any additional IRT input was requested on both topics by 7 August.</p> <p>Part A: Specifically, IRT is requested to consider—(a) should we consider reducing the required period from 15 days to some shortened period? (b) if a proposal for a shortened timeline is drafted, do you have recommendations for what the baseline timeline should be?</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>Point 2: I agree with point 1 w/r/t the domain name registration. Maybe we need to add—basis for immediate notification to registrar for invocation of the RAA provision (re: cancellation). If the Rr did not cancel they would have a compliance issue. So drop the last 5 words and substitute requirement to immediately notify registrar.</p> <p>Point 3 (chat): Remove all references to the registration of the domain</p> <p>Point 4: I agree with point 2. There will be some sort of EPP connection in place for affiliates; for non-affiliates we should expand a bit re: the costs attached, that allows Rr to bill the providers</p> <p>Point 5: Agree with Steve (point 2). The P/P provider is limited to suspending the services it provides to its customer.</p> <p>(group asked about the recommendation to notify the registrar)</p>	<p>Part B: Provided any additional input received affirms input to date, or if no additional input received, language will be left as-is, so that Providers are required to specify in ToS/Customer Agreement that if Provider gives Customers the option to cancel in lieu of disclosure of their information, this option would not apply in cases where the name is involved in a UDRP/URS proceeding.</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>Point 6: if I am understanding this proposal, customers will be allowed approximately 30 days before a domain name will be suspended. 15 for p/p and 15 for registrar.</p> <p>Point 7: Please clarify if Point 6 is what we are proposing.</p> <p>Point 8: (Re: point 6) That would be unfortunate and we should try to avoid a second bite at the apple. Especially for affiliated providers that seems unfair. Then you have someone who gives false info and because they used an affiliate provider they get an extra 15 days. We should try to avoid that outcome. But I don't see this 15 day provision as necessarily a floor. Both the provider and the registrar could have a shorter period.</p> <p>Point 9: re: point 6: I understand why it is convenient to pull from the RAA but in this case we are making the period far too long. I believe in our instance if we are told info is inaccurate we provide customer several days (maybe 3) to correct that info, and then service would be removed, info would be restored and</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>then it would become a registrar matter and they could cancel/suspend the name itself. We could do something similar here to keep it more efficient and give customer incentive to correct the info and keeps PP provider and Rr actions separate and compartmentalized.</p> <p>Point 10: re point 6 I agree that we should not add time to this process</p> <p>Point 11: sounds like we need to clarify more consisely that upon uncorrected false whois, we need an explicit obligation to cancel p/p service.</p> <p>Point 12: The intention of the PDP was not to extend this.. different registrars do things differently, so long as it is within the parameters. The intention wasn't to give anyone 30 days.</p> <p>Point 13: agree re: timing</p> <p>Point 14: agree we need a floor and that p/p providers can chose to have quicker turn around times</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>Point 15: RAA uses stronger language—this says “basis for suspension.” RAA says the registrar SHALL. I’m wondering whether should think about having that language based on that here.</p> <p>The RAA Spec language ends with "Registrar either terminate or suspend or place on Client Hold or and client Transfer Prohibited." The PPAA should contain a more specific obligation, not "be a basis for suspension or cancellation."</p> <p>Point 16: support noted for points 14 and 15.</p> <p>On-list, 2 August: Regarding Section 3.5.4.1, what if we used language that provided some > flexibility regarding the time frame? For example: > > A Customer's willful provision of inaccurate or unreliable > information, its willful failure to update information provided to > Provider within seven (7) days of any change, OR ITS FAILURE TO > RESPOND TO PROVIDER INQUIRIES WITHIN THE TIME FRAME REQUIRED BY</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>> PROVIDER’S TOS (NOT TO EXCEED (15) DAYS) concerning the accuracy of</p> <p>> contact details associated with the Registered Name for which Provider</p> <p>> is providing the Services constitute a material breach of the service</p> <p>> agreement between such Customer and Provider and be a basis for</p> <p>> suspension or cancellation of the Services.</p> <p>This proposal was supported by 3 other IRT members.</p> <p>On-list, 3 August: Note the language at the end needs to be revised along the lines of the RAA, as I think was tentatively agreed on the last call.</p> <p>On-list, 7 August: I support Sara's suggested language (on list 2 August, above).</p> <p>Part B: On list (31 July): as I recall one (or possibly two) WG members felt strongly that customers should be provided the option of cancelling their registrations rather than having their contact points published, and that this should be a required policy for all accredited providers. There was a lot</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>of pushback against such a mandate, with the compromise solution that the provider be allowed, but not required, to adopt such a policy (which of course would have to be adequately disclosed). In practice I agree that such a policy could only be implemented by a provider that is either Affiliated with (i.e., controlled by) a registrar, or at least as the result of some kind of contractual agreement between the registrar and an unaffiliated provider. As I read 3.5.4.17 it simply says that no such policy can trump the applicable UDRP or URS policies as adopted by ICANN. This make sense to me and I don't know of any reason 3.5.4.17 has to be changed in this regard.</p> <p>1 August IRT call: Point 1: Providers can't block the cancellation of the domain. (similar points raised by other IRT members)</p> <p>Point 2: this should be in the ToS Point 3: Perhaps all this means is that the P/P provider should provide notice to the customer of this cancellation lock issue?</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>Point 4: I think this language is OK. The PDP WG recommended that Providers should be able to give customers the option to cancel a domain in lieu of having their information disclosed, but not if the name is subject to UDRP proceedings. The Provider should disclose this to the customer and the public.</p> <p>Point 5: Prohibition of cancelation of a domain name during a UDRP is a registrar obligation I see no reason to include this language in the P/P accreditation agreement.</p>	
7	3.6.1	Accreditation Fees	Fees to be discussed at a later date.		
8	3.6.2	Variable Fees	Who would be responsible for variable fees if Provider does not pay them? Under the Registry Agreement, Registry Operators must pay if Registrars do not.		
9	3.12	Contact Info	The Final Report states that “ <i>P/P service providers should be fully contactable through the publication of contact details on their websites in a manner modeled after Section 2.3 of the 2013 RAA Specification on Privacy and Proxy Registrations.</i> ” Section 3.12 of the Draft is the proposed mechanism for implementing this recommendation. Please advise.	<p>On list (31 July): Section 3.12 seems reasonable to me. I guess the only question is whether the officer information (3.12.16) needs to be published, although it certainly should be provided to ICANN.</p> <p>During 1 August IRT meeting:</p>	<p>Discussed on 1 August IRT call.</p> <p>Resolved. Language will remain as-is in PPAA draft v2.</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>Point 1 (chat): This seems in line with the PDP recommendations and what registrars do today.</p> <p>Point 2 (chat): if its line w/ what registrars do today, seems ok to keep</p> <p>Point 3: support having officer info available</p>	
10	3.18.3	Reveal Requirements	What disclosure of contact details is contemplated?	<p>On list (31 July): This provision was included in the WG report to make clear that providers had flexibility in how they handle disclosure/ publication requests and did not have to adopt automated, one size fits all systems. If the provider adopts a policy that those who present sufficiently detailed /credible /urgent disclosure requests will be put in direct touch with customers, even if that means disclosing one means of such contact to the requester, there should be no problem with that so long as the provider’s policy is adequately disclosed in accordance with accreditation standards.</p> <p>1 August IRT call: Point 1: This is part of giving providers as much flexibility as possible. Providers might respond to a</p>	<p>Discussed on 1 August IRT call.</p> <p>Resolved. Language in PPAA draft v2 will be left as-is</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>disclosure request by passing it along or sharing the email address where it would send it to try to help to resolve an issue quickly. This seems to come down to a disclosure issue—telling the Customer in the ToS that in some cases the Provider might disclose certain information to facilitate resolution. Not sure what further might be needed here—not intending to micro-manage.</p> <p>1 Aug IRT call (chat): 2 IRT members agreed; it aligns with the PDP</p>	
11	3.19.1	Transfer of Registered Names Requirements	Please advise on how transfers should work in connection with the de-Accreditation of a Service Provider.		
12	5.2	Accreditation Term	The Draft contemplates a five year term. Please advise if that is appropriate.	<p>8 August IRT call</p> <p><u>Eric Rokobauer</u>: 5 years seems fine</p> <p><u>Susan Kawaguchi</u>: 5 years seems reasonable</p> <p><u>Theo Geurts</u>: 5 is good</p> <p><u>Carlton Samuels</u>: No issue as long as it is connected to some kind of evaluative framework</p> <p><u>Roger Carney</u>: 5 years is good</p>	<p>Discussed at 8 August IRT meeting. No changes needed based on IRT feedback.</p> <p>Resolved.</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
13	5.7.1	Provider Suspension	<p>On the Registrar side, ICANN notifies Registry Operators to implement a lock which prevents Registrars from registering new domains or receiving inbound transfers. This will be more difficult to police on the PP side as registrars can be told not to accept new registrations from a service provider but they may not have means to easily block registrations. Please advise as to whether you think this is adequate or if you have additional suggestions on this topic.</p>	<p>On list (31 July): Any registrar that receives after the suspension date a registration from the suspended provider could reject it if it is labeled as required...I suppose adequate time would need to be allowed before the suspension becomes effective but I imagine this could be managed.</p> <p>1 August IRT call: Point 1—if the registration is labeled with the Provider ID, that will enable the registrar to know if a registration is from a suspended provider</p> <p>Point 2—it comes to the question of how the registrar can do this from a practical perspective</p> <p>Point 3—as a registrar I can't imagine how a provider is suspended and how to prevent them from completing a signup—not sure how that would work operationally</p> <p>Point 4—once someone is accredited, they get a number and you would be able to look at the field on an automated basis to see if the # is from a suspended provider, if there is a reasonable notification process and enough lead time</p>	<p>Discussed at 1 August IRT meeting. ICANN has evaluated IRT feedback thus far and found no consensus among the group. ICANN solicited additional feedback from registrar subteam, as this concerns a technical issue. The deadline for responses was set for 18 August.</p> <p>Once contractual provision is finalized, draft Policy should be reviewed to ensure prohibition on registrar knowing acceptance of registrations from nonaccredited entities include entities on suspended status.</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>Point 5: sounds like we need an EPP for p/p providers</p> <p>In chat, expressions of support for points 4 and 5</p> <p>Re: Point 5: But needs some exploring I guess? It might shut out non-affiliated providers</p> <p>It shouldn't - assuming standard authN/authZ mechanisms and some kind of credential mechanism.</p> <p>Agreed, but how should a lawyer deal with all this when they want to offer some privacy to their clients? Build a full EPP and Escrow Service?</p>	
				<p>On-list, 7 August: Blocking new registrations will present technical challenges and still just not sure how we can achieve it (whether affiliated with an ICANN ID or not).</p> <p>And maybe something to keep in mind - those applying are doing so in order to obtain the right to provide privacy/proxy as a service. And if those providers were to be in</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>violation, they could lose their right to offering that service.</p> <p>Do we intend for it to also mean they lose the right to doing registrations also? Having this section feels like it would suggest that.</p>	
14	Data Escrow Specification	Data Escrow	<p>The Draft contemplates a modified version of the data escrow specification from the new gTLD Registry Agreement. This will be discussed during 25 July 2017 IRT meeting.</p> <p>This model was chosen based on the results of the IRT poll, but it is unclear how this will function in conjunction with IRT recommendation that registrar-affiliated providers should be able to escrow through the registrar (who will be using a different specification).</p>	<p>Point 1 (on list): Perhaps RAA section 3.6 could be adapted for the p/p accreditation context. (Of course, if the RAA provision is modified in the future to align more closely with the registry obligations, the p/p obligations may be able to move in lockstep with it.)... What is the downside of this approach? Put another way, what would be the advantage gained by aligning the p/p escrow obligations with those of registries, rather than those of registrars?</p> <p>Point 2 (on list): In short, it is nice to see most of the stuff listed in a section and being up to date! But most of it is not new for Registrars, and as a contracted party I have no issue with it.</p> <p>What is missing in this specification is</p>	Updated specification, per IRT feedback in 25 July call and in poll, to be discussed at 29 August IRT meeting.

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>that the non-affiliated privacy provider should specify at which registrar the domain name is, they provide privacy services for in the deposit. For Registrars or affiliated privacy services, this is a nonissue as anything at a different Registrar is no longer provided by those Registrars or affiliated providers as a service.</p> <p>Point 3 (on list): I remember the F2F in Dublin - it was agreed that any third party provider would have to do the same as a registrar. Theo has highlighted those parts, but, ultimately we have to have the same standards for the escrow service to accept the data, whether that be for the registrar or third party provider. I'll also mention that I am sure the current escrow services will not change the way they currently accept data, nor process it for ICANN compliance.</p>	
				<p><u>IRT Input on 25 July IRT call</u></p> <p>Volker Greimann—Option 2 was not envisioned by the PDP WG—they</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>said it should be modeled on what the registrars are doing. No need to expand to accommodate PP data bc registrars are already required to escrow underlying PP data. The only problem we have to tackle is how third-party providers would escrow; makes sense to use Option 1—only option that is viable.</p> <p>Darcy Southwell—totally agree with Volker</p> <p>Sara Bockey—agree with Volker</p> <p>Theo Geurts—leaning toward option 1</p> <p>Volker Greimann: The solution envisioned by the PDP WG was that there would be no need for _any_ implementation for affiliated proxy service providers. Darcy Southwell: +1 Volker</p> <p>Sara Bockey: Exactly. Our processes should NOT change.</p> <p>Volker Greimann: Registrars already have to escrow underlying registrant details with the escrow provider (BTW: When will the number of free</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>providers finally be expanded?) as secondary data set. There is simply no need for any additional application</p> <p>The PDP WG did not recommend implementing updated standards or verification processes. There is no mandate from the WG to expand this.</p> <p>Steve Metalitz: it would be helpful for staff to share what final report said re: this topic</p>	
15	Customer Data Accuracy Program Specification	Data Accuracy	<p>This was adapted from the RAA, in furtherance of the Policy Recommendation that “P/P customer data is to be validated and verified in a manner consistent with the requirements outlined in the WHOIS Accuracy Program Specification of the 2013 RAA (as may be updated from time to time). In the cases where a P/P service provider is Affiliated with a registrar and that Affiliated registrar has carried out validation and verification of the P/P customer data, re-verification by the P/P service provider of the same, identical, information should not be required.” (Final Report p. 9)</p> <p>IRT input is sought on this draft specification in its entirety.</p>	<p>8 August IRT Meeting:</p> <p><u>Alex Deacon</u>: I think this is a good approach (copying RAA)</p> <p><u>Theo Geurts</u>: I think for third-party providers, I don’t know how they would be able to comply with this specification. There’s a lot of stuff that requires the provider to do stuff, and non-affiliates likely don’t have an EPP connection to the Rr and I’m not sure how they would comply with those.</p> <p><u>Vicky Sheckler</u>: Agree with Alex.</p> <p><u>Lindsay Hamilton-Reed</u>: Agree with Theo</p>	<p>Discussed at 8 August IRT meeting.</p> <p>Additional IRT feedback requested on list by 21 August.</p> <p>Absent contrary feedback from the IRT, the “Review” provision will be deleted from this specification in the next draft.</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p><u>Vicky Sheckler</u>: We should move forward unless we hear from a TPP why they can't comply with this.</p> <p>IRT asked about whether we should keep the "review" provision of this specification.</p> <p><u>Alex Deacon</u>: I think that makes sense, given that this is a requirement on icann and not the provider</p> <p>Feedback 15 August IRT call:</p> <p>Steve Metalitz (following up on message to list): The specification covers some of the same requirements as 3.5.4.1, but the requirements of the specification and 3.5.4.1 are not identical. 3.5.4.1 references suspension of PP, one references cancelation/the other termination, etc. It seems providers would want to know which one to follow. That discrepancy should be addressed—likely should include that ToS are going to include provision of accurate contact data and you don't want to foreclose possibility that service might enforce that against the customer.</p>	

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				Theo Geurts (on list): How does a Registrar verify a request to suspend/delete a domain name from a provider that is not affiliated? Based on the current requirements if I would get such a request, the not affiliated privacy provider has to make sure that I will not be liable for any suspension or deletion. Till then I would ignore such requests as a Registrar as I have no contract with them.	
16	Registration Data Directory Service Labeling Specification	Data Fields	Please review and provide feedback regarding which fields you believe are applicable. This is appropriated from the RAA, but certain fields may not be applicable (including Registry Admin/Tech IDs). Should Customers be required to designate admin and tech contacts?		To be discussed at 29 August IRT meeting.
17	Law Enforcement Authority Disclosure Framework Specification	Conformance	This Specification will need to be evaluated in relation to the entire PPAA.		Discussed at 8 August meeting. No changes needed at this time.
18	Law Enforcement Authority Disclosure Framework Specification	Definitions	Definitions adjusted from most recent LEA framework draft to accommodate other defined terms in PPAA. "Requestor" changed to "LEA Requestor" because "Requestor" is defined more generally in Section 1.35; definitions for "Provider" and		Discussed at 8 August meeting. Any additional input requested by 14 August. If no additional input is received, this will be marked "resolved" and language will be kept as-is.

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
			<p>“Customer” removed because these are already defined in Section 1.</p>		Resolved.
19	Law Enforcement Authority Disclosure Framework Specification	Receipt Process (Section 3.2.1)	<p>Proposed edit from PSWG: I'd like to propose the following revision to the first paragraph in section 3.2.1:</p> <p><i>"Within 24 hours of the disclosure request being submitted, the Provider will review the request to ensure it contains the relevant information required to meet the minimum standard for acceptance."</i></p>	<p>IRT feedback on 8 Aug IRT call: <u>Sara Bockey:</u> The problem with this timeframe is it doesn't take into consideration weekends or holiday. Not all PP services are 24/7.</p> <p>Nick Shorey: Crime also doesn't take into account weekends and holidays and that is the nature of the challenges we face.</p> <p><u>Lindsay Hamilton-Reed:</u> I agree with Sara. We should not have this written in stone if we can't respond in time.</p> <p><u>Nick Shorey:</u> We are trying to be consistent with the RAA. I think one of the original concerns was that we might be shifting from the RAA and hopefully this is more consistent.</p> <p><u>Sara Bockey:</u> No, not the RAA. I mean with PP services. I don't believe they currently respond within 24 hours</p> <p><u>Nick Shorey:</u> Hopefully, this will provide the facility—if the provider is unable to action a request in time, the provider at least has to alert the</p>	<p>Discussed at 8 August meeting.</p> <p>Additional IRT feedback requested on list by 14 August.</p> <p>Topic has been added to agenda for 22 August IRT meeting for follow-up discussion based on IRT discussion on-list.</p>

Issue	Section	Topic	Issue	Additional IRT Feedback	Status
				<p>requester that the request has been received and is being processed. This is important on the LEA side when we are factoring in risk.</p> <p><u>Theo Geurts</u>: Privacy Providers are not in all cases Registrars, is it realistic we impose RAA 2013 obligations on them?</p> <p><u>Sara Bockey</u>: What if we change this to within 1 business day? Not 24 hours</p> <p><u>Theo Geurts</u>: This will exclude third-party providers—requiring them to perform as a registrar more or less. This could be called out in the public comment period.</p> <p><u>Ashley Heineman</u>: Is there a reason to hold PP providers to a lower standard when it comes to law enforcement needs? Particularly if they are being accredited by ICANN?</p> <p><u>Nick Shorey</u>: (re proposal for 1 business day) we proposed 24 hours because, similar to the point you made, crime does not always work on business hours and you have to maintain the ability to react and respond. What we have done is</p>

				<p>remove the obligation to respond at the end of the 24 hour deadline which should remove the concern expressed by operators previously and bring it more in line with the 2013 RAA.</p> <p><u>Lindsay Hamilton Reed</u>: One business day works better.</p> <p><u>Susan Kawaguchi</u> (echoing Ashley's comment)—why would you hold PP to a lower standard than Rrs? If provider can sell services 24/7, they should have a mechanism to review LEA requests within 24 hours. I think this is a good compromise—they are not asking for anything except a review and a simple response of we need more information.</p> <p><u>Alex Deacon</u>: Would an automated response to a request (e.g. "thanks we have received your response and will respond to your request soon...") meet this obligation?</p> <p><u>Carlton Samuels</u>: Should not be the case. Its the service we must focus on. Simplify the rules as best as possible but same rules for everybody who wants to provide the service. Equal protection for all</p>

				<u>Vicky Sheckler</u> : agree w/ ashley and susan. pp should not be held to a lower std.	
20	Intellectual Property Disclosure Framework Specification	Conformance	This Specification will need to be evaluated in relation to the entire PPAA.		To be discussed on 22 August IRT call.
21	RAA Synchronization	Updates to the RAA	The introductory paragraph of Specification 2 contains a provision contemplating automatic updates if an analogous provision is updated in the RAA. Please advise if this is workable and confirm whether other RAA-modeled provisions should receive similar treatment. This seems advisable to avoid inconsistencies across the agreements. Some of the definitions that have their origins in the RAA are inherently going to be differently phrased in the PPAA due to different defined terms, etc. so if this concept is kept then there will need to be some form of implementation to harmonize them.	<p>Input received on 15 August IRT call:</p> <p>>Theo Geurts: Not sure about this. The RAA is about registrars. The PPAA is about Privacy Providers. These aren't the same, so perhaps we should not automatically synchronize. That needs some thinking before we just apply one obligation from one contract over to another.</p> <p>>Steve Metalitz: I think in principle this makes sense, and do to this more globally, not just in Spec 2. Two suggestions: (1) if we have this WG/reconvened IRT, it might make sense for ICANN to present the changes to the group for a look (the</p>	<p>Discussed at 15 August IRT meeting. Any additional IRT feedback requested by 21 August.</p> <p>If IRT confirms this course of action, next step is to identify all PPAA sections that should be sync'ed and incorporate contractual language to that effect.</p>

				<p>non-substantive modifications); (2) drafting issue—first phrase about provision being automatically amended, I can send text edits on that.</p> <p>>Theo @Steve that sounds reasonable >Alex: agree with Steve >Roger Carney: this is a good concept but same concern as Theo—not sure we can directly tie this. I like Steve’s idea of when these changes come up, pursue them and get them agreed-upon assuming it makes sense that the provision is changed. Some agreement before the change takes effect.</p> <p>>Carlton SAMUELS: If the RAA is substantially amended and the amendment flows thru to the PPAA, then at minimum the mandatory requirement is notice first then a timeline to respond. That response from the WG may trigger additional work or acceptance of the amendment in whole or part.</p>	
22	Rights in Data (Section 3.3)	Proposed Edits	Remove extra “)” after “query-based public access.” Update reference to WHOIS to Registration Data Directory Service. Propose to remove second sentence, as this does not impose an obligation on Provider and is merely an		Resolved.
