

# ASCII-Unicode Diacritics Analysis Report

## On behalf of the ICANN Latin Script Diacritics Policy Development Process WG (LD-WG)

*This version of the report was generated at: 2025-04-08 22:29:12*

This report was generated using the ASCII-Unicode Diacritics Analyzer Tool (v1.0a), and can be generated by any other interested party with [the tool's Python source code in Github](#), released under 'The Unlicense', equivalent to Public Domain. This software was developed independently by a community member, with no official affiliation with or endorsement by the ICANN organization.

The tool implements Unicode normalization (NFD) to analyze Latin script code points from ICANN's [Label Generation Rules](#) and identifies characters that canonically decompose to ASCII base characters plus combining diacritical marks (Unicode General Category M). Results are categorized by diacritic count and output to this structured PDF report with complete Unicode technical data.

For inquiries about the code, contact the maintainer:  
Mark W. Datysgeld (mark@governanceprimer.com)

### Characters with One Diacritic Mark (106)

Character	Base	Diacritic	Technical Details
à U+00E0	a	`	a (LATIN SMALL LETTER A, U+0061) + ` (COMBINING GRAVE ACCENT, U+0300)
