

## Initial Report on the Transfer Policy Review Policy Development Process - Phase 1(a)

### Status of This Document

---

This is the Phase 1(a) Initial Report of the GNSO Transfer Policy Review Policy Development Process Working Group that has been posted for public comment.

### Preamble

---

The objective of this Initial Report is to document the working group's (i) deliberations on charter questions, (ii) preliminary recommendations, and (iii) additional identified issues to consider before the working group issues its Final Report. After the working group reviews public comments received in response to this report and completes Phase 1(b) of the PDP, the working group will submit its combined Phase 1 Final Report to the GNSO Council for its consideration.

33

34

# 1 Executive Summary

## 1.1 Introduction

The Transfer Policy, formerly referred to as the Inter-Registrar Transfer Policy (IRTP), is an ICANN consensus policy that went into effect on 12 November 2004. The policy governs the procedure and requirements for registrants to transfer their domain names from one Registrar to another, also referred to as an inter-Registrar transfer. The goal of the Transfer Policy was to provide for enhanced domain name portability, resulting in greater consumer and business choice and enabling registrants to select the Registrar that offers the best services and price for their needs.

On 18 February 2021, the GNSO Council [initiated](#) a Policy Development Process (PDP) two-phased PDP to review the Transfer Policy. The PDP is tasked with addressing the following topics:

- Phase 1(a): Form of Authorization (including EPDP Phase 1, Recommendation 27, Wave 1 FOA issues<sup>1</sup>) and AuthInfo Codes
- Phase 1(b): Change of Registrant (including EPDP Phase 1, Recommendation 27, Wave 1 Change of Registrant issues)
- Phase 2: Transfer Emergency Action Contact and reversing inter-Registrar transfers, Transfer Dispute Resolution Policy (including EPDP Phase 1, Recommendation 27, Wave 1 TDRP issues), Denying (NACKing) transfers<sup>2</sup>, ICANN-approved transfers

The working group charter was [approved](#) by the GNSO Council on 24 March 2021. The Phase 1(a) working group held its first meeting on 14 May 2021.

For additional background on this PDP, please refer to Annex A of this report.

## 1.2 Preliminary Recommendations

In Phase 1(a) of the PDP, the working group was tasked to provide the GNSO Council with recommendations on the following topics:

---

<sup>1</sup> For additional information about the EPDP Phase 1, Recommendation 27, Wave 1 Report, please see pages 52-56 of the [Final Issue Report](#).

<sup>2</sup> The topic of denying (NACKing) transfers was later moved to Phase 1(a) by [Project Change Request](#) to ensure that the working group could examine all elements of the security model for domain name transfers in a holistic manner as part of its Phase 1 deliberations.

69

- 70 • Losing and Gaining Forms of Authorization (FOA)
- 71 • AuthInfo Codes
- 72 • Denying (NACKing) transfers
- 73 • EPDP Phase 1, Recommendation 27, Wave 1 as they relate to FOA

74

75 Following its analysis of each of the questions outlined in its charter related to this task,  
76 the working group has arrived at a set of preliminary recommendations and conclusions.

77

78 The working group will not finalize its responses to the charter questions and  
79 recommendations to the GNSO Council until it has conducted a thorough review of the  
80 comments received during the public comment period on this Initial Report and  
81 completed Phase 1(b) of its work. At this time, no formal consensus call has been taken  
82 on these responses and preliminary recommendations, but this Initial Report did receive  
83 the support of the working group for publication for public comment.

84

85 Notwithstanding the above, the working group is putting forward preliminary  
86 recommendations on the following topics for community consideration:

87

88 [RECOMMENDATIONS]

89

### 90 1.3 Conclusions and Next Steps

91

92 This Initial Report will be posted for public comment for xx days. The working group will  
93 review the public comments received on this Initial Report and consider whether any  
94 changes need to be made to its Phase 1(a) recommendations. The working group will  
95 complete Phase 1(b) of its work, including a Phase 1(b) Initial Report followed by a  
96 public comment period on the Phase 1(b) Initial Report. The working group will finalize  
97 all Phase 1 recommendations in a single Phase 1 Final Report to be sent to the GNSO  
98 Council.

99

### 100 1.4 Other Relevant Sections of this Report

101 The following sections are included within this report:

- 102 ■ Explanation of the working group's methods and process  
103 for reaching preliminary recommendations;
- 104 ■ Responses to the charter questions, preliminary  
105 recommendations, and questions for community input;
- 106 ■ Background on the PDP and issues under consideration;

- 107 ■ Documentation of who participated in the working  
108 group's deliberations, including attendance records, and  
109 links to Statements of Interest as applicable;
- 110 ■ Documentation on the solicitation of community input  
111 through formal SO/AC and SG/C channels and responses.

112

## 2 Working Group Approach

113

114

115 This section provides an overview of the working methodology and approach of the  
116 working group. The points outlined below are meant to provide the reader with relevant  
117 background information on the working group’s deliberations and processes and should  
118 not be read as representing the entirety of the efforts and deliberations of the working  
119 group.

120

### 121 2.1 Project Plan

122

123 The working group’s first deliverable was to provide the GNSO Council with a Phase 1(a)  
124 project plan. To develop the project plan, the leadership team sought input from  
125 members about the sequence in which to address topics and the amount of time each  
126 topic would take to discuss. This input was used to develop the project plan, which was  
127 delivered to the GNSO Council for its consideration during the 22 July 2021 Council  
128 meeting.

129

### 130 2.2 Early Community Input

131

132 In accordance with GNSO policy development process requirements, the working group  
133 [sought written input](#) on the charter topics from each Supporting Organization, Advisory  
134 Committee and GNSO Stakeholder Group / Constituency. The input received was  
135 incorporated into the working group’s deliberations as each topic was discussed. Since  
136 all groups that provided written input also had representative members or appointed  
137 subject matter experts in the working group, those members were well positioned to  
138 respond to clarifying questions from other members about the written input as it was  
139 considered.

140

### 141 2.3 Methodology for Deliberations

142

143 The working group began its deliberations for Phase 1(a) on 14 May 2021. The working  
144 group agreed to continue its work primarily through conference calls scheduled weekly,  
145 in addition to email exchanges on its mailing list. The working group held sessions during  
146 ICANN71, ICANN72, ICANN73, and ICANN74. These sessions provided an opportunity for  
147 the broader community to contribute to the working group’s deliberations and provide  
148 input on the charter topics being discussed.

149

150 All of the working group’s work is documented on its wiki workspace, including its  
151 meetings, mailing list, meeting notes, deliberation summaries, draft documents,  
152 background materials, early input received from ICANN org, and input received from

153 ICANN’s Supporting Organizations and Advisory Committees, including the GNSO’s  
154 Stakeholder Groups and Constituencies.

155  
156 To develop the content included in the Initial Report, the working group progressed  
157 through the charter questions by topic, following the sequence established in the  
158 project plan. Because the Phase 1(a) topics are closely interrelated, the working group  
159 took an iterative approach to producing and reviewing draft responses to charter  
160 questions and draft recommendations to ensure that the full package of outputs was  
161 coherent and comprehensive.

162  
163 To ensure that all groups represented in the working group had ample opportunity to  
164 provide input to the deliberations, the leadership team opened each working group  
165 meeting with an invitation for members to step forward and provide any updates about  
166 discussions happening within their SO/AC/SG/Cs regarding the charter topics, as well as  
167 any positions or interests that members wanted to share on behalf of their groups. To  
168 further support fulsome discussion, the leadership team regularly deployed informal  
169 polls in the meeting Zoom room to get a better sense of the “temperature of the room”  
170 and to prompt the sharing of perspectives and viewpoints that may not otherwise be  
171 voiced through less structured interaction.

172  
173 For those working group members who were less comfortable speaking on calls, the  
174 leadership team encouraged additional feedback on the mailing list and through written  
175 contributions to working group documents.

176

## 177 2.4 Use of Working Documents

178  
179 The working group used a series of working documents, organized per charter topic, to  
180 support its deliberations. Archives of the working documents are maintained on the  
181 working group [wiki](#). When a new charter topic was introduced, the leadership team  
182 provided a working document for the topic, including (i) charter questions related to  
183 that topic and for each charter question, (ii) context from the Transfer Policy Status  
184 Report, and (iii) relevant inputs received from community groups through early  
185 outreach. As the working group progressed through discussions, staff captured a  
186 summary of deliberations on the charter question and eventually populated the  
187 document with draft charter question responses and draft recommendations to support  
188 further discussion and refinement of the text.

189  
190 Working documents were updated on an ongoing basis and working group members  
191 were encouraged to provide comments and input in the working documents between  
192 calls.

193

194 **2.5 Data and Metrics**

195

196 The [Transfer Policy Status Report](#) produced by ICANN org in 2019 served as the working  
197 group’s primary resource for data and metrics related to inter-Registrar transfers. In the  
198 course of its deliberations, the working group identified additional data that would be  
199 valuable to support its work. The additional data provided by ICANN org’s Contractual  
200 Compliance Department in response to these requests is available on the working  
201 group’s [wiki](#).

202

203 **2.6 ICANN Org Interaction**

204

205 To help support a smooth transition from policy development to eventual  
206 implementation of GNSO Council adopted and ICANN Board approved  
207 recommendations, the working group has been supported by early and ongoing  
208 engagement with ICANN org subject matter experts. Liaisons from ICANN org’s Global  
209 Domains and Strategy (GDS) and Contractual Compliance departments regularly  
210 attended working group calls, providing input and responding to questions where it was  
211 possible to do so in real time. The liaisons acted as a conduit for working group  
212 questions to ICANN org that required additional research or input. The liaisons also  
213 facilitated early review of working group draft outputs by ICANN org subject matter  
214 experts.

215

216 **2.7 Accountability to the GNSO Council**

217

218 As is now the case with all GNSO working groups, the working group delivered monthly  
219 “project packages” to the GNSO Council to update the Council on the status of its work.  
220 An archive of these packages is available on the [wiki](#). The GNSO Council Liaison, Greg  
221 DiBiase, served as an additional point of connection between Council and the working  
222 group.

223

## 3 Working Group Responses to Charter Questions and Preliminary Recommendations

The WG was chartered to provide the GNSO Council with policy recommendations regarding the issues identified in the [Final Issue Report on a Policy Development Process to Review the Transfer Policy](#).

Following its analysis of each of the questions outlined in its Charter related to this task, the working group has arrived at a set of preliminary recommendations and conclusions.

Within the text of this document, the key words "MUST", "MUST NOT", "REQUIRED", "SHALL", "SHALL NOT", "SHOULD", "SHOULD NOT", "RECOMMENDED", "NOT RECOMMENDED", "MAY", and "OPTIONAL" are to be interpreted as described in [BCP 148 \[RFC2119\]](#) [[RFC8174](#)].

The working group will not finalize its responses to the charter questions and recommendations to the GNSO Council until it has conducted a thorough review of the comments received during the public comment period on this Initial Report and completed Phase 1(b) of its work. At this time, no formal consensus call has been taken on these responses and preliminary recommendations, but this Initial Report did receive the support of the working group for publication for public comment.

Where certain proposals or potential recommendations have yet to be finalized, square brackets around specific options under consideration have been used to indicate this.

The working group believes that when it formulates its final recommendations, if approved by the GNSO Council and the ICANN Board, there will be substantial improvement to the current environment. The following sub-sections of this report are organized by topic. Within each topic, the working group provides responses to the relevant charter questions and corresponding preliminary recommendations:

- Section 3.1: Gaining and Losing Forms of Authorization (FOA)
- Section 3.2: Transfer Authorization Code/AuthInfo Code Management
- Section 3.3: EPDP Phase 1, Recommendation 27, Wave 1 Report
- Section 3.4: Denying (NACKing) Transfers
- Section 3.5: Post-Registration and Post-Transfer Inter-Registrar Transfer Locks

261

## 262 3.1 Gaining and Losing Forms of Authorization (FOA)

263

264 For context on this topic and the associated charter questions, please see pages 7-14 of  
265 the [Final Issue Report](#).

266

### 267 3.1.1 Charter Question a1

268

269 Is the requirement of the Gaining FOA still needed? What evidence did the working  
270 group rely upon in making the determination that the Gaining FOA is or is not necessary  
271 to protect registrants?

272

273 **Working Group Response:**

274

275 **Recommendations:**

276

### 277 3.1.2 Charter Question a2

278

279 If the working group determines the Gaining FOA should still be a requirement, are any  
280 updates (apart from the text, which will likely need to be updated due to the gTLD  
281 Registration Data Policy) needed for the process? For example, should additional  
282 security requirements be added to the Gaining FOA (two-factor authentication)?

283

284 **Working Group Response:**

285

286 **Recommendations:**

287

### 288 3.1.3 Charter Question a3

289

290 The language from the Temporary Specification provides, “[u]ntil such time when the  
291 RDAP service (or other secure methods for transferring data) is required by ICANN to be  
292 offered, if the Gaining Registrar is unable to gain access to then-current Registration  
293 Data for a domain name subject of a transfer, the related requirements in the Transfer  
294 Policy will be superseded by the below provisions...”. What secure methods (if any)  
295 currently exist to allow for the secure transmission of then-current Registration Data for  
296 a domain name subject to an inter-Registrar transfer request?

297

298 **Working Group Response:**

299

300 **Recommendations:**

301

### 302 3.1.4 Charter Question a4

303

304 If the working group determines the Gaining FOA is no longer needed, does the  
305 AuthInfo Code provide sufficient security? The Transfer Policy does not currently require  
306 specific security requirements around the AuthInfo Code. Should there be additional  
307 security requirements added to AuthInfo Codes, e.g., required syntax (length,  
308 characters), two-factor authentication, issuing restrictions, etc.?

309

310 **Working Group Response:**

311

312 **Recommendations:**

313

### 314 3.1.5 Charter Question a5

315

316 If the working group determines the Gaining FOA is no longer needed, does the  
317 transmission of the AuthInfo Code provide a sufficient “paper trail” for auditing and  
318 compliance purposes?

319

320 **Working Group Response:**

321

322 **Recommendations:**

323

### 324 3.1.6 Charter Question a6

325

326 Survey respondents noted that mandatory domain name locking is an additional  
327 security enhancement to prevent domain name hijacking and improper domain name  
328 transfers. The Transfer Policy does not currently require mandatory domain name  
329 locking; it allows a Registrar to NACK an inter-Registrar transfer if the inter-Registrar  
330 transfer was requested within 60 days of the domain name’s creation date as shown in  
331 the Registry RDDS record for the domain name or if the domain name is within 60 days  
332 after being transferred. Is mandatory domain name locking an additional requirement  
333 the working group believes should be added to the Transfer Policy?

334

335 **Working Group Response:**

336

337 **Recommendations:**

338

### 339 3.1.7 Charter Question a7

340

341 Is the Losing FOA still required? If yes, are any updates necessary?

342

343 **Working Group Response:**

344

345 **Recommendations:**

346

### 347 3.1.8 Charter Question a8

348

349 Does the CPH Proposed Tech Ops Process represent a logical starting point for the  
350 future working group or policy body to start with? If so, does it provide sufficient  
351 security for registered name holders? If not, what updates should be considered?

352

353 **Working Group Response:**

354

355 **Recommendations:**

356

### 357 3.1.9 Charter Question a9

358

359 Are there additional inter-Registrar transfer process proposals that should be  
360 considered in lieu of or in addition to the CPH TechOps Proposal? For example, should  
361 affirmative consent to the Losing FOA be considered as a measure of additional  
362 protection?

363

364 **Working Group Response:**

365

366 **Recommendations:**

367

## 368 3.2 Transfer Authorization Code/AuthInfo Code Management

369

370 For context on this topic and the associated charter questions, please see pages 15-19  
371 of the [Final Issue Report](#).

372

### 373 3.2.1 Charter Question b1

374

375 Is AuthInfo Code still a secure method for inter-Registrar transfers? What evidence was  
376 used by the working group to make this determination?

377

378 **Working Group Response:**

379

380 **Recommendations:**

381

### 382 3.2.2 Charter Question b2

383

384 The Registrar is currently the authoritative holder of the AuthInfo Code. Should this be  
385 maintained, or should the Registry be the authoritative AuthInfo Code holder? Why?

386

387 **Working Group Response:**

388

389 **Recommendations:**

390

391

### 392 3.2.3 Charter Question b3

393

394 The Transfer Policy currently requires Registrars to provide the AuthInfo Code to the  
395 registrant within five [calendar] days of a request. Is this an appropriate SLA for the  
396 Registrar's provision of the AuthInfo Code, or does it need to be updated?

397

398 **Working Group Response:**

399

400 **Recommendations:**

401

### 402 3.2.4 Charter Question b4

403

404 The Transfer Policy does not currently require a standard Time to Live (TTL) for the  
405 AuthInfo Code. Should there be a standard Time To Live (TTL) for the AuthInfo Code? In  
406 other words, should the AuthInfo Code expire after a certain amount of time (hours,  
407 calendar days, etc.)?

408

409 **Working Group Response:**

410

411 **Recommendations:**

412

### 413 3.2.5 Charter Question b5

414

415 Should the ability for registrants to request AuthInfo Codes in bulk be streamlined and  
416 codified? If so, should additional security measures be considered?

417

418 **Working Group Response:**

419

420 **Recommendations:**

421

### 422 3.2.6 Charter Question b6

423

424 Does the CPH TechOps research provide a logical starting point for future policy work on  
425 AuthInfo Codes, or should other options be considered?

426

427 **Working Group Response:**

428

429 **Recommendations:**

430

### 431 3.2.7 Charter Question b7

432

433 Should required differentiated control panel access also be considered, i.e., the  
434 registered name holder is given greater access (including access to the auth code), and  
435 additional users, such as web developers would be given lower grade access in order to  
436 prevent domain name hijacking?

437

438 **Working Group Response:**

439

440 **Recommendations:**

441

## 442 3.3 EPDP Phase 1, Recommendation 27, Wave 1 Report

443

444

445 For context on this topic and the associated charter questions, please see pages 52-56  
446 of the [Final Issue Report](#).

447

### 448 3.3.1 Charter Question c1

449

450 How should the identified issues be addressed?

### 451 3.3.2 Charter Question c2

452

453 Can the FOA-related Transfer Policy issues (identified in paragraphs 5 and 9 of Wave 1  
454 Report), as well as the proposed updates to the Gaining and Losing FOAs, be discussed  
455 and reviewed during the review of FOAs?

456

## 457 3.4 Denying (NACKing) Transfers

458

459 The topic of denying (NACKing) transfers was originally planned for Phase 2 of the PDP.  
460 It was later moved to Phase 1(a) by [Project Change Request](#) to ensure that the working  
461 group could examine all elements of the security model for domain name transfers in a  
462 holistic manner as part of its Phase 1 deliberations.

463

464 For context on this topic and the associated charter questions, please see pages 43-48  
465 of the [Final Issue Report](#).

466

### 467 3.4.1 Charter Question h1

468

469 Are the current reasons for denying or NACK-ing a transfer sufficiently clear?  
470 Should additional reasons be considered? For instance, ICANN Contractual  
471 Compliance has observed difficulties from Registrars tying transfer denials  
472 involving domain names suspended for abusive activities to the denial instances  
473 contemplated by the Transfer Policy; or should any reasons be removed?

474

475 **Working Group Response:**

476

477 **Recommendations:**

478

### 479 3.4.2 Charter Question h2

480

481 Should additional guidance around cases subject to a UDRP decision be provided to  
482 ensure consistent treatment by all Registrars? If so, is this something that should be  
483 considered by the RPMs PDP Working Group's review of the UDRP, or should it be  
484 conducted within a Transfer Policy PDP?

485

486 **Working Group Response:**

487

488 **Recommendations:**

489

## 490 3.5 Post-Registration and Post-Transfer Inter-Registrar Transfer 491 Locks

492

493 **Recommendations:**

494

495

## 496 4 Next Steps

497

498 This Initial Report will be posted for public comment for xx days. The working group will  
499 review the public comments received on this Initial Report and consider whether any  
500 changes need to be made to its Phase 1(a) recommendations. The working group will  
501 complete Phase 1(b) of its work, including a Phase 1(b) Initial Report followed by a  
502 public comment period on the Phase 1(b) Initial Report. The working group will finalize  
503 all Phase 1 recommendations in a Final Report to be sent to the GNSO Council for  
504 review. If adopted by the GNSO Council, the Final Report would then be forwarded to  
505 the ICANN Board of Directors for its consideration and, potentially, approval as an  
506 ICANN Consensus Policy.

507

508 Following a charter review process, phase 2 of the PDP will commence.

509

510

511

## Annex A - Background

512

513

514 The Transfer Policy, formerly referred to as the Inter-Registrar Transfer Policy (IRTP), is  
515 an ICANN consensus policy that went into effect on 12 November 2004. The policy  
516 governs the procedure and requirements for registrants to transfer their domain names  
517 from one Registrar to another, also referred to as an inter-Registrar transfer. The goal of  
518 the Transfer Policy was to provide for enhanced domain name portability, resulting in  
519 greater consumer and business choice and enabling registrants to select the Registrar  
520 that offers the best services and price for their needs.

521

522 On April 22, 2019, ICANN org delivered the [Transfer Policy Status Report](#) to the GNSO  
523 Council. ICANN org delivered the Transfer Policy Status Report pursuant to  
524 Recommendation 17 of the Inter-Registrar Transfer Policy (IRTP) Part D PDP Working  
525 Group's [Final Report](#), which provides, "[t]he Working Group recommends that  
526 contracted parties and ICANN should start to gather data and other relevant  
527 information that will help inform a future IRTP review team in its efforts." The Transfer  
528 Policy Status Report provided a foundation to review the history and underlying goals of  
529 Transfer Policy, the five policy development processes that sought to improve the  
530 Transfer Policy, and associated metrics on the Transfer Policy.

531

532 During its meeting on September 19, 2019, the GNSO Council agreed to launch a call for  
533 volunteers for a Transfer Policy Review Scoping Team, comprised of interested and  
534 knowledgeable GNSO members that were tasked with advising the GNSO Council by  
535 providing recommendations on the following:

536

- approach to the review (for example, by initiating a new PDP);
- composition of the review team or PDP working group, and
- scope of the review and future policy work related to the Transfer Policy.

537

538

539

540 On April 6, 2020, the Transfer Policy Review Scoping Team delivered its [Transfer Policy](#)  
541 [Review Scoping Paper](#) to the GNSO Council for its consideration. The Scoping Team  
542 recommended that the GNSO Council instruct ICANN org policy support staff to draft an  
543 Issue Report, outlining, et.al., the issues described in its Scoping Report. On 23 June  
544 2020, the GNSO Council voted to approve a motion requesting a Preliminary Issue  
545 Report, for delivery as expeditiously as possible, on the issues identified in the Transfer  
546 Policy Initial Scoping Paper, to assist in determining whether a PDP or series of PDPs  
547 should be initiated regarding changes to the Transfer Policy.

548

549 The [Final Issue Report](#) addressed eight issues associated with the Transfer Policy, seven  
550 of which were specifically identified by the Transfer Policy Review Scoping Team:

551

552

- a. Gaining & Losing Registrar Form of Authorization ("FOA")
- b. Authcode Management
- c. Change of Registrant

553

554

- 555 d. Transfer Emergency Action Contact (“TEAC”)
- 556 e. Transfer Dispute Resolution Policy (“TDRP”)
- 557 f. Reversing/NACKing Transfers
- 558 g. ICANN-Approved Transfers
- 559 h. EPDP Phase 1, Recommendation 27, Wave 1 Report

560

561 On 18 February 2021, The GNSO Council passed a [resolution](#) to initiate a two-phased  
562 PDP to review the Transfer Policy using the approach recommended in the Final Issue  
563 Report:

564

- 565 • Phase 1(a): Form of Authorization (including EPDP Phase 1, Recommendation 27,  
566 Wave 1 FOA issues) and AuthInfo Codes
- 567 • Phase 1(b): Change of Registrant (including EPDP Phase 1, Recommendation 27,  
568 Wave 1 Change of Registrant issues)
- 569 • Phase 2: Transfer Emergency Action Contact and reversing inter-Registrar  
570 transfers, Transfer Dispute Resolution Policy (including EPDP Phase 1,  
571 Recommendation 27, Wave 1 TDRP issues), Denying (NACKing) transfers, ICANN-  
572 approved transfers

573

574 The topic of denying (NACKing) transfers was later moved to Phase 1(a) by [Project](#)  
575 [Change Request](#) to ensure that the working group could examine all elements of the  
576 security model for domain name transfers in a holistic manner as part of its Phase 1  
577 deliberations.

578

579 A small group of Councilors reviewed the draft Charter included in the Final Issue Report  
580 and finalized the document. The charter was [approved](#) by Council on 24 March 2021.

581

582 The Phase 1(a) working group held its first meeting on 14 May 2021.

583

584  
585  
586  
587  
588  
589  
590  
591  
592  
593  
594  
595

## Annex B - Working Group Membership and Attendance

[INSERT TABLE]

The detailed attendance records can be found at  
<https://community.icann.org/x/U4aUCQ>.

The working group email archives can be found at  
<https://mm.icann.org/pipermail/gnso-tpr/>.

## Annex C - Community Input

596

597

### 598 4.1 Request for Input

599

600 According to the GNSO's PDP Manual, a PDP working group should formally solicit  
601 statements from each GNSO Stakeholder Group and Constituency at an early stage of its  
602 deliberations. A PDP working group is also encouraged to seek the opinion of other  
603 ICANN Supporting Organizations and Advisory Committees who may have expertise,  
604 experience or an interest in the issue. As a result, the working group reached out to all  
605 ICANN Supporting Organizations and Advisory Committees as well as GNSO Stakeholder  
606 Groups and Constituencies with a request for input at the start of its deliberations. In  
607 response, statements were received from:

608

- 609 ■ The GNSO Business Constituency (BC)
- 610 ■ The Registries Stakeholder Group (RySG)
- 611 ■ The At-Large Advisory Committee (ALAC)
- 612 ■ The Security and Stability Advisory Committee (SSAC)

613

614 The full statements can be found on the working group wiki here:

615 <https://community.icann.org/x/tIT8CQ>.

616

### 617 4.2 Review of Input Received

618

619 All of the statements received were added to the to the relevant working documents  
620 and considered by the working group in the context of deliberations on each topic.
