

Recap of CJK coordination meeting on 15&16 May 2015 in Seoul

A. Agreement

A1 The CJK GPs agree with the principle framework of Yoneya's proposed algorithm for coordination of the CJK LGRs for Han characters, and agree to work together to refine the algorithm to incorporate respective language requirements

B. Important pick-ups from what IP says

B1 If 3GP share some subtypes, WLE must be coordinated. But if 3GP do not share any subtype, 3GP don't need to coordinate regarding WLE, technically.
Ex, C wants S,T,B, J wants just A, there's no need no coordinate regarding the WLE.

B2 IP wants to see a small number (such as 3) of allocatable labels within variant labels. IP doesn't intend to say '3' is a specific number they must observe.

C. Future schedule & homework

C1 CGP and JGP will review the output of LGR-2 applied Yoneya's algorithm and give a formal comment or conclusion of output.
(Wang Wei and Yoneya)

C2 Statistics of label application and delegation historically.
(Dr. Yan and Yoneya)

C3 CGP will draft a question list and write CJK public letter for IP of ICANN by the end of this month and send to JGP and KGP for their feedback to see if we need to make it the CJK letter and bring it to ICANN53.
(Wang Wei)

C4 Agreed terminology document by ICANN53.
(Yoneya)

C5 Agreed algorithm document by ICANN53.
(Yoneya)

C6 KGP drafts issue list and timeline by ICANN53.
(KGP chair)

C7 CJK wants 1 meeting before and after IP meeting (90 Min).
(Hiro)
