FELLOWSHIP PROGRAM

American Registry for Internet Numbers

ARIN
American Registry for Internet Numbers

Established in December 1997 as a Regional Internet Registry, the American Registry for Internet Numbers (ARIN) is responsible for the management and distribution of Internet number resources such as Internet Protocol (IP) addresses and Autonomous System Numbers (ASNs).

Welcoming new members and growing the ARIN community is important. To help accomplish this objective, ARIN launched its Fellowship Program in 2009 to broaden inclusion, diversity, engagement, and volunteerism amongst community members within the ARIN region.

This year, the ARIN Fellowship program is going virtual and 10 selected Fellows will ...

- Be paired with a Mentor to guide them through the program

- Take part in a structured four-week online experience (Thursdays 25 March - 15 April)

- Learn from "Getting to Know You" breakout sessions with other Fellows and Mentors

- Have robust roundtable discussions related to the ARIN Policy Development Process

- Meet ARIN staff, past Fellows, and other experienced community members

- Receive specific mentorship time to help achieve career goals and continued growth in the technology field

- Prepare to attend and participate virtually in ARIN 47 (12-14 April) and beyond!

Thank you for partnering with us to help spread the word in your community!
