

Zoom Chat Transcript – NCSG DNS Abuse WP call – 4 February 2021

10:34:06 From Farzaneh Badiei to Everyone : recording is fine

10:41:43 From Bruna Martins dos Santos to Everyone : <https://rrsg.org/wp-content/uploads/2020/10/CPH-Definition-of-DNS-Abuse.pdf>

10:44:28 From Farzaneh Badiei to Everyone : wow. Really interesting Tatiana ...

10:44:35 From Bruna Martins dos Santos to Everyone : Their questions to us were the following:

10:44:35 From Bruna Martins dos Santos to Everyone : What information do you use and how do you use it to assess DNS Abuse levels? What are the NCSG's pain points regarding DNS Abuse Are you seeing practices from registrars or registries you find helpful?

10:46:07 From Raymond Mamattah (ICANN70 Fellow) to Everyone : I agree with Tatiana, we have to start by understanding what DNS abuse means.

10:46:12 From David Cake to Everyone : I very much agree with Tatiana. Scope creep on the definition of DNS Abuse is a continual issue.

10:46:44 From Tatiana Tropina to Everyone : New hand yes :-)

10:48:19 From Farzaneh Badiei to Everyone : I just don't want this to turn into a ICANN consensus policy without going through the right processes

10:48:34 From Bruna Martins dos Santos to Everyone : Yes, Farz, that is a fair concern

10:49:31 From Tatiana Tropina to Everyone : Farzaneh, I have the same concern

10:49:47 From Tatiana Tropina to Everyone : And I believe that it is very very likely the case

10:49:50 From Farzaneh Badiei to Everyone : I am gonna say something embarrassing! I can't find the raise your hand feature after a year of using Zoom daily hahaha

10:49:58 From Tatiana Tropina to Everyone : In reactions

10:50:05 From Tatiana Tropina to Everyone : The changed it

10:50:09 From Tatiana Tropina to Everyone : *they

10:50:09 From Farzaneh Badiei to Everyone : Yes Tatiana. It was a follow up to the information you provided . It is a real concern

10:50:12 From Bruna Martins dos Santos to Everyone : Farz, I spent an entire call last week thinking I was silenced

10:50:16 From Bruna Martins dos Santos to Everyone : so I feel you

10:50:22 From Poncelet Ileleji to Everyone : +1

10:50:41 From Farzaneh Badiei to Everyone : why do they change things all the time.. don't wanna make us feel comfortable ha ...

10:51:14 From Tatiana Tropina to Everyone : Farzaneh, I am not sure I provided the entire scope, I am myself trying to spin my head around where this issue pops up but certainly on the council it is going to be a thing, then I remember talking about DNS abuse as replies to Board at the meeting with them and I think it was GNSO/board. It's a lot and I lost track

10:51:54 From Farzaneh Badiei to Everyone : Tatiana I think we might want to raise a process issue - if appropriate

10:52:11 From Tatiana Tropina to Everyone : We haven't shaped the agenda for the council meeting yet but something is telling me that DNS abuse has a good chance to pop up either (1) in connection with subpro or (2) in connection with CPH is doing

10:52:56 From Farzaneh Badiei to Everyone : So worrying.

10:53:00 From Tatiana Tropina to Everyone : Raised several times. For ICAnn we can but there is nothing like... policy yet they say lets discuss lets discuss. CPH can do what they want as contracted parties in a way

10:53:41 From Tatiana Tropina to Everyone : So if something comes from subpro because there was an issue of DNS abuse that wasn't addressed and it made some unhappy — that would be our moment to jump and say process

10:54:14 From Tatiana Tropina to Everyone : (Again, I don't know how the discussion from subpro will come up. Perhaps there will finally be a working group on DNS abuse? I don't know!)

10:54:39 From Farzaneh Badiei to Everyone : Raising hand! sorry.. gotta be mechanical

10:54:57 From Tatiana Tropina to Everyone : Farzaneh, it's in "reactions" button.

10:55:12 From Farzaneh Badiei to Everyone : I think I haven't updated it ! I see nothing like raise hand...

10:56:01 From Poncelet Ileleji to Everyone : yes

10:56:09 From Raymond Mamattah (ICANN70 Fellow) to Everyone : Just as we have seen the Registries Constituency definitions on DNS abuse, is it possible to get similar definitions from other constituencies as well?

10:56:48 From Bruna Martins dos Santos to Everyone : I don't think there is and this can be an initial task for us - check what are the other DNS abuse definitions SOs and ACs are working with

10:57:01 From Bruna Martins dos Santos to Everyone : *dont think theres any mapping

10:57:48 From Poncelet Ileleji to Everyone : Yep

10:58:05 From Tatiana Tropina to Everyone : Guys look here

I'm not sure if I'll have time to be really active, but I'd be able to review and comment on the documents, mainly about IP & DNS issues

11:04:09 From Tatiana Tropina to Everyone : Yes let's hear from them. Guys I have to leave. Thanks for an interesting conversation. Hopefully more on the list and on the policy call. Stay safe all.

11:04:30 From Farzaneh Badiei to Everyone : I also did some reading on history of DNS abuse discussion at ICANN. I can put something together
