

## **Draft AGB Language - Definition of “Material Impact” for Predictability Framework**

22 January 2025

*“Material impact” within the context of the Predictability Framework means the implementation of new procedures or operations for the new gTLD Program, or a change to ICANN’s procedures or operations for the New gTLD Program, that will likely: (1) change the status of an application, (2) change the outcome of an evaluation of an application, (3) have a non-trivial monetary or operational impact on applicants, or (4) have a non-trivial impact on the timeline of application processing, up and until delegation.*
